To: Whom It May Concern,

The program I am in charge of at IBM Global Services includes Web Applications Delivery to the company partners and also Software Engineering services around web and JEE technologies. I have had the real pleasure to work with Gregory Anne during the last six months since he had the opportunity to realize his French university Masters degree's thesis inside our Global Delivery Center and IT Park. I want to take this occasion to recommend Gregory for any upcoming application in his career drive.

During the six months Gregory took to study our process, workflow, methods, technologies and context, I employed him as any regular IBMer. I proposed him tasks of a developer, a business analyst, a team leader, a software designer and therefore I can testify to his constant and easy ability to adapt and to assimilate all of our techniques and all of our strict quality requirements.

I witnessed his wide science web/web 2.0 and Java background, I also got to appreciate his very team-player attitude and his good skills to communicate efficiently either in French or in English with the stakeholders group. Gregory quickly learned to manage his time, working under strict deadlines.

I feel confident that Gregory can carry out, propose solutions in, bring success to various IT establishments projects.
