To Whom It May Concern,

As an associate professor at Paul Cézanne University (College and Postgraduate School), I have had the pleasure of knowing Grégory Anne for this last year, since he has chosen to study his final major at our institute. I would like to take this opportunity to recommend Grégory for any application in Software Engineering.

I feel confident that he will continue to succeed in his projects and furthermore be a valuable asset to any company he may work for during his career. Grégory is a dedicated student and thus far he has proven to be a person who takes charge and is able to successfully develop projects and implement them. He attended all my lectures and has been able to carry out all of his practical assignments.

As far as I am concerned, I can certify that Grégory is competent in the use of Java/J2EE technologies and their involvement in modern web/software architectures ; his science background also includes specification and design techniques, database management, and web 2.0 technologies.

He has long since become a valuable member of his year and a friendly and positive student.

It is for these reasons that I offer high recommendations for Grégory without reservation. His drive and abilities will truly be an asset to your establishment.

Yours faithfully,

Jean Caussanel.
